**Goodbye® Stain and Mark Eraser** is an innovative cleaning product powered by the microscopic abrasive qualities of genuine melamine resin-based foam. When combined with water, the unique properties of gentle abrasion and conformability “erase” away stains and marks often untouched by many chemical products. This breakthrough approach to cleaning is environmentally sensitive and ideal for use in the most restrictive of regulatory concerns as it requires no traditional cleaning chemicals or VOCs. The addition of the blue durability strip provides dimensional stability to harness both the power and the longevity of each individual eraser. The eraser quickly removes crayon, marker, ink, lipstick, tea & coffee stains, soap scum, scuff marks, fingerprints, hard water spots, red wine residue, burn marks and more from walls, appliances, and other surfaces such as brass, chrome, copper - just about any surface you can find. Say **Goodbye®** to your toughest stains and marks.

**Melamine Foam**

...is a unique, flexible, open-cell material in the amino plastics family. Similar to the durable plastic cook-ware from yesterday, this same type of chemistry is also found in soundproofing, insulation, clothing, textiles, and more.

**Blue Durability Strip**

...separates the commercial version from consumer imitations. The sandwich style engineering reinforces the shape of both sides to minimize wear and degradation from professional use. It will provide additional absorbency as well.
